

Bachelor of Science in Health Information Management

Name of Programme	Bachelor of Science in Health Information Management
Programme Overview	Fascinated by the intersection of healthcare and technology? The BSc in Health Information Management equips learners to manage health data, information systems, and technology solutions. This interdisciplinary programme combines health sciences, IT, and management principles, preparing graduates for careers in healthcare data management and analytics. Students develop expertise in maintaining data integrity, privacy, and compliance with healthcare regulations, alongside analytical, technical, and managerial skills. Graduates are well-prepared for roles such as Health Information Managers or Clinical Data Analysts, making a meaningful contribution to the future of healthcare information management.
Admission Requirements	IGCSE/equivalent with 5 Passes including English, Mathematics and Biology/Double Sciences. Applicants in possession of a Diploma or Higher Diploma in related fields may be given exemptions based on the credit point equivalency.
Technical Requirements	To ensure a smooth and effective learning experience, students enrolling in this programme must meet the following technical requirements: Device Requirements Computer/Laptop: Windows (10 or later) or Mac (macOS 10.15 or later); Processor: Intel i3 (or equivalent) or above; RAM: Minimum 4 GB (8 GB recommended for multitasking); Storage: Minimum 20 GB free space for coursework and downloads; Camera and Microphone: Built-in or external for live sessions and presentations OR Tablet/Smartphone: Suitable for accessing content on the go (limited functionality for assignments/exams) Internet Requirements Connection speed: Minimum 5 Mbps download and 2 Mbps upload (10 Mbps recommended for seamless video conferencing); Stable Wi-Fi or Ethernet connection recommended for live Zoom sessions Software and Platforms Virtual Live Sessions: Zoom (synchronous learning); Document Processing: Microsoft Office (Word, Excel, PowerPoint) or equivalent (Google Docs) Browser Requirements Supported browsers: Chrome (latest version), Safari (for Mac users); Cookies and JavaScript: Enabled for full Blackboard functionality Additional Tools (Optional but Recommended) Headset: For clear audio during virtual classes; External storage (USB/Cloud): For backups of important coursework; Antivirus software: To protect against malware or data loss
Typical Full-Time Study Period	4 Years
Number of Modules	35 (32 core + 3 elective)
Total Programmes Credits	480
Fees per Programme Credit	\$13
Total Tuition Fee	\$6,240

SEMESTER 1

Computer and its Essentials 1

Code: C5-CE1-20	This module provides a foundational understanding of computers and their essentials, covering basic functions, hardware and software components, and how they operate. It explores the history and evolution of computers and data processing. Students will learn about Microsoft Office, with an emphasis on Microsoft Word and PowerPoint. Through hands-on activities and assessments, learners will develop a comprehensive understanding of computer essentials.
Module Fees: \$130	
Module Credits: 10	

Academic Writing for STEM

Code: D6-AWS-20	The purpose of this module is to equip students with essential skills in academic writing, focusing on clear and structured communication in the STEM fields. The module covers citation and referencing techniques, as well as research writing skills, enabling students to effectively present and support their academic work.
Module Fees: \$130	
Module Credits: 10	

Introduction to Anatomy and Physiology

Code: D6-IAP-21	The purpose of this module is to equip students with a foundational understanding of human anatomy and physiology. It focuses on system-wide concepts, enabling students to connect these concepts with terminology used in disease coding and transcription, thus providing essential knowledge for healthcare-related fields.
Module Fees: \$260	
Module Credits: 20	

Business Management 1

Code: B5-BM1-20	This module introduces business management as a discipline, addressing core concepts, economic systems, and stakeholder roles. It examines the business environment, management functions, and key areas including operations, finance, human resources, and marketing. Leadership principles and theories are explored to build a foundation for sound business strategy and decision-making.
Module Fees: \$130	
Module Credits: 10	

Law and HIM Practice

Code: D6-LHP-23	The purpose of this module is to provide students with a comprehensive understanding of health law, the legal system, and its application in healthcare settings. Topics include the role of health professionals in managing legal risks, ethical issues in the workplace, and resolving medico-legal problems effectively.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 2

Computer and its Essentials 2

Code: C6-CE2-20	This module builds on foundational computing skills, equipping students with advanced capabilities in Microsoft Excel and Google collaboration tools. It covers key spreadsheet functionalities, including data organisation, advanced formulas, chart creation, and data analysis using pivot tables. Additionally, students will explore Google Docs, Spreadsheets, Forms, and Drive to enhance online collaboration and information sharing.
Prerequisite: C5-CE1-20	
Module Fees: \$130	
Module Credits: 10	

Business Management 2

Code: B6-BM2-20	This module provides a foundation in management principles, addressing managerial roles, strategic planning, decision-making, and organisational structures. It explores human resource management, change management, diversity, and logistics. Emphasis is placed on adapting to environmental shifts, utilising information systems, and developing skills for sustainable competitive advantage in contemporary business contexts.
Prerequisite: B5-BM1-20	
Module Fees: \$130	
Module Credits: 10	

Introduction to Pathology and Pharmacology

Code: D6-IPP-21	The purpose of this module is to provide foundational knowledge on the pharmacology of drugs and the pathology of diseases. It explores the role of drugs in modern medicine, linking this understanding to the essential knowledge needed for accurate coding of drugs and diseases in healthcare.
Prerequisite: D6-IAP-21	
Module Fees: \$260	
Module Credits: 20	

Principles of Marketing

Code: B5-PMK-20	This module introduces the fundamentals of marketing, covering the 7 P's, consumer behaviour, and decision-making processes. It examines market research, segmentation, and targeting strategies, alongside product development, pricing, and promotion. Students gain essential skills to apply marketing principles effectively in dynamic and competitive business environments.
Module Fees: \$130	
Module Credits: 10	

Health Ethics

Code: D6-HET-21	The purpose of this module is to provide students with an understanding of medical ethics and the legal aspects surrounding healthcare practices. It focuses on promoting good ethical practices, particularly in the handling of patient-related data, ensuring confidentiality, respect, and compliance with legal standards in healthcare settings.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 3

Introduction to Medical Terminology

Code: D6-IMT-21	The purpose of this module is to provide students with a foundational understanding of medical terms used in healthcare. It covers terminology related to various disease conditions, as well as the musculoskeletal, respiratory, and digestive systems, enabling effective communication in medical and clinical settings.
Prerequisite: D6-IPP-21	
Module Fees: \$260	
Module Credits: 20	

Basic Life Support and Emergency Care

Code: D5-BLS-21	The purpose of this module is to equip learners with essential skills to respond effectively in emergency situations. It covers fundamental life-saving techniques, including first aid, and emergency response procedures, ensuring readiness to provide immediate care in critical situations.
Module Fees: \$130	
Module Credits: 10	

Introduction to E-Health

Code: D5-IEH-21	The purpose of this module is to provide an understanding of key e-health concepts, the integration of healthcare processes with information systems, and e-health implementation. It explores challenges in low-resource settings and examines current research trends, equipping students with essential knowledge for digital transformation in healthcare.
Module Fees: \$130	
Module Credits: 10	

Operations Management

Code: B6-OPM-20	The purpose of this module is to equip students with essential principles and techniques for efficient production and distribution of goods and services while minimising waste. It covers key areas such as product and service creation, purchasing, inventory management, quality control, logistics, and process evaluation to enhance operational efficiency.
Module Fees: \$130	
Module Credits: 10	

Medical Databases

Code: D5-MDB-25	The purpose of this module is to introduce students to medical databases, including SQL and OpenMRS. Students will learn how to design, manage, and analyse healthcare data, ensuring efficient storage and retrieval of patient records. The module emphasises data security, integrity, and compliance with healthcare standards.
Prerequisite: C6-CE2-20	
Module Fees: \$130	
Module Credits: 10	

SEMESTER 4

Introduction to Global Health

Code: D5-IGH-23	The purpose of this module is to explore global health strategies, financing, and implementation in today's world. It examines the socioeconomic and environmental determinants of health, highlighting their impact on communities. Students will gain insights into global health challenges and solutions for improving health outcomes worldwide.
Module Fees: \$130	
Module Credits: 10	

Epidemiology

Code: D6-EPI-13	The purpose of this module is to equip students with essential skills to study disease patterns and risks. It covers measures of disease occurrence, study design, clinical test accuracy, epidemiological analysis methods, and research ethics, enabling students to critically evaluate public health data and contribute to disease prevention and control.
Module Fees: \$260	
Module Credits: 20	

Medical Transcription

Code: D6-ITR-25	The purpose of this module is to equip students with the skills to accurately transcribe dictated patient records and edit transcribed files. Emphasis is placed on practical transcribing, ensuring proficiency in medical documentation, terminology, and formatting to maintain accuracy and professionalism in healthcare communication.
Prerequisite: D6-IMT-21	
Module Fees: \$130	
Module Credits: 10	

Computing in Health Administration

Code: D6-CHA-25	The purpose of this module is to equip students with the skills to use technology in managing health-related data. It covers Medical Decision Support Systems, Clinical Decision Support Systems, Natural Language Processing, and Weka for predictive risk analysis using machine learning, concept learning, training, and classification.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 4 ELECTIVE GROUP (CHOOSE ONE)

Introduction to Financial Accounting

Code: A5-IFA-20	This module provides a foundational understanding of financial accounting principles and techniques. Students will be introduced to accounting, financial record preparation, and adjustments aligned with international accounting standards. Emphasising error analysis and financial reporting, the module equips students with essential skills to manage financial records and support informed business decision-making
Module Fees: \$130	
Module Credits: 10	

Fundamentals of Financial Management

Code: B5-FFM-25	The purpose of this module is to equip students with the skills to prepare, analyse, and interpret financial information essential for decision-making, planning, and resource management in healthcare organisations. It focuses on understanding financial data to effectively manage and control resources.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 5

Biostatistics

Code: D7-BIO-23	The purpose of this module is to provide students with the foundational knowledge and skills in statistical methods used in the field. It covers data analysis, probability, statistical inference, and the application of statistical tools to interpret biological and medical research effectively.
Prerequisite: D6-EPI-13	
Module Fees: \$260	
Module Credits: 20	

Procurement and Tender Management

Code: B6-PTM-21	The purpose of this module is to develop a deeper understanding and expertise in procurement and tender management. It focuses on the factors influencing the procurement and tender processes and critically assesses their role in improving the performance of small businesses.
Module Fees: \$130	
Module Credits: 10	

Data Management and Information Governance

Code: D7-DMI-23	The purpose of this module to equip students with knowledge of data governance principles, focusing on confidentiality, data protection, subject access requests, and freedom of information. This module aims to ensure students understand the legal and ethical responsibilities related to managing and safeguarding data effectively.
Module Fees: \$260	
Module Credits: 20	

Principles of Community Health

Code: D6-PCM-23	The purpose of this module is to provide students with an understanding of the key concepts and strategies in promoting and improving community health. It covers topics such as health promotion, disease prevention, and the role of social determinants in influencing public health outcomes.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 6

Health Information Systems

Code: D7-HIS-21	The purpose of this module is to equip students with knowledge and skills in collection, storage, retrieval, communication, and use of health-related data. It covers computer literacy, information systems literacy, and defines key terms related to information systems, while also identifying the essential components of health information systems.
Prerequisite: D7-DMI-23	
Module Fees: \$260	
Module Credits: 20	

Fundamentals of Health Insurance

Code: D6-FHI-23	The purpose of this module is to provide an in-depth understanding of key aspects of health insurance, including its history, major insurance industries, and the coding systems used within the sector. It aims to equip students with foundational knowledge to navigate and analyse the health insurance industry effectively.
Module Fees: \$130	
Module Credits: 10	

Disease Coding

Code: D7-DCO-13	The purpose of this module is to provide students with a comprehensive understanding of ICD-10 diagnostic and procedural coding conventions and guidelines. It covers coding for inpatient, outpatient, and ambulatory care settings, equipping students with the skills needed to accurately assign codes for various medical conditions and procedures.
Prerequisite: D6-IMT-21	
Module Fees: \$260	
Module Credits: 20	

Research Methods

Code: D7-RME-23	The purpose of this module is to equip students with a comprehensive understanding of quantitative, qualitative, and systematic review methodologies. Students will learn to critically read and analyse health sciences literature, gaining the skills to evaluate research studies and apply appropriate methodologies.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 7

Health Information Risk Management

Code: D7-HIR-21	The purpose of this module is to explore key risk management concepts within the healthcare sector. It covers medical malpractice, strategies for reducing liability, and effective approaches to managing potential risks. Additionally, the module examines litigation alternatives to enhance organisational resilience and mitigate legal challenges in healthcare settings.
Module Fees: \$130	
Module Credits: 10	

Entrepreneurship and Innovation

Code: B8-ENI-20	The purpose of this module is to equip students with the knowledge and skills necessary to understand entrepreneurial processes and behaviours. It explores the fundamentals of entrepreneurship, including the creation and development of business ideas, and the essential steps in crafting a comprehensive business plan for successful ventures.
Module Fees: \$260	
Module Credits: 20	

Research Project 1 (Proposal)

Code: D7-RPP-25	The purpose of this module is to equip students with the essential skills to write comprehensive research proposals. This includes formulating research questions, reviewing literature, developing a methodology, and presenting a clear plan for investigation. The module focuses on structured writing and critical thinking in research proposal development.
Prerequisite: D7-RME-23	
Module Fees: \$130	
Module Credits: 10	

SEMESTER 7 ELECTIVE GROUP (CHOOSE TWO)

Health Economics

Code: D7-HEC-23

The purpose of this module is to equip students with the fundamental principles and tools used in health economics. It provides a comprehensive understanding of how economic principles can be applied to healthcare systems, including cost-effectiveness analysis, resource allocation, and the economic evaluation of health interventions.

Module Fees: \$130

Module Credits: 10

Project Management

Code: B7-PRM-20

The purpose of this module is to equip students with the skills and knowledge necessary for effective project planning and control. It covers various tools and techniques for managing projects efficiently, including the use of Microsoft Project scheduling software.

Module Fees: \$130

Module Credits: 10

Human Resource Management

Code: B7-HRM-20

This module introduces Human Resource Management (HRM) in organisations, focusing on managing human capital strategically. Students will learn HR practices like recruitment, development, employee relations, and health and safety. They will also explore union roles, human capital development, and HR policies to drive organisational success and maintain a safe, productive workplace.

Module Fees: \$130

Module Credits: 10

SEMESTER 8

Professional Practice in HIM

Code: D7-PPR-21

Prerequisite: 240 credits

The purpose of this module is to provide students with the necessary skills and knowledge to excel in the field of Health Information Management (HIM). It focuses on the ethical, legal, and practical aspects of HIM practice, emphasising professional conduct, data management, and healthcare regulations.

Module Fees: \$520

Module Credits: 40

Research Project 2 (Dissertation)

Code: D8-RPD-25

Prerequisite: D7-BIO-23, D7-RPP-25

The purpose of this module is to guide students through the process of conducting independent research, building on the knowledge gained from the research proposal. Students will refine their research questions, collect data, analyse results, and present findings, developing critical thinking and research skills essential for academic and professional success.

Module Fees: \$260

Module Credits: 20
