

Name of Programme	Bachelor of Science in Hospital Administration
Programme Overview	Aspiring to a leadership role in healthcare? The BSc in Hospital Administration is a specialised programme designed to develop essential knowledge and skills for managing modern healthcare organisations. It integrates business administration, healthcare management, and public health principles to address the sector's unique challenges. Learners explore healthcare systems, hospital operations, and patient care protocols, gaining a holistic understanding of this complex industry. With its blend of theory, case studies, and experiential learning, the programme prepares graduates to optimise resources, improve healthcare delivery, and enhance patient outcomes across hospitals, clinics, and related settings.
Admission Requirements	IGCSE/equivalent with 5 Passes including English and Mathematics. Applicants in possession of a Diploma or Higher Diploma in related fields may be given exemptions based on the credit point equivalency.
Technical Requirements	To ensure a smooth and effective learning experience, students enrolling in this programme must meet the following technical requirements: Device Requirements Computer/Laptop: Windows (10 or later) or Mac (macOS 10.15 or later); Processor: Intel i3 (or equivalent) or above; RAM: Minimum 4 GB (8 GB recommended for multitasking); Storage: Minimum 20 GB free space for coursework and downloads; Camera and Microphone: Built-in or external for live sessions and presentations OR Tablet/Smartphone: Suitable for accessing content on the go (limited functionality for assignments/exams) Internet Requirements Connection speed: Minimum 5 Mbps download and 2 Mbps upload (10 Mbps recommended for seamless video conferencing); Stable Wi-Fi or Ethernet connection recommended for live Zoom sessions Software and Platforms Virtual Live Sessions: Zoom (synchronous learning); Document Processing: Microsoft Office (Word, Excel, PowerPoint) or equivalent (Google Docs) Browser Requirements Supported browsers: Chrome (latest version), Safari (for Mac users); Cookies and JavaScript: Enabled for full Blackboard functionality Additional Tools (Optional but Recommended) Headset: For clear audio during virtual classes; External storage (USB/Cloud): For backups of important coursework; Antivirus software: To protect against malware or data loss
Typical Full-Time Study Period	4 Years
Number of Modules	36 (34 core + 2 elective)
Total Programmes Credits	480
Fees per Programme Credit	\$13
Total Tuition Fee	\$6,240

SEMESTER 1

Computer and its Essentials 1

Code: C5-CE1-20	This module provides a foundational understanding of computers and their essentials, covering basic functions, hardware and software components, and how they operate. It explores the history and evolution of computers and data processing. Students will learn about Microsoft Office, with an emphasis on Microsoft Word and PowerPoint. Through hands-on activities and assessments, learners will develop a comprehensive understanding of computer essentials.
Module Fees: \$130	
Module Credits: 10	

Human Biology 1

Code: D5-HB1-25	This module introduces the fundamental principles of human anatomy and physiology. It covers tissues, cartilage, bones, and joints, as well as the composition and functions of blood. Topics include respiratory, digestive, urinary, cardiovascular, endocrine, and nervous systems, providing essential knowledge for healthcare and related disciplines.
Module Fees: \$260	
Module Credits: 20	

Academic Writing for STEM

Code: D6-AWS-20	The purpose of this module is to equip students with essential skills in academic writing, focusing on clear and structured communication in the STEM fields. The module covers citation and referencing techniques, as well as research writing skills, enabling students to effectively present and support their academic work.
Module Fees: \$130	
Module Credits: 10	

Principles of Management

Code: D6-POM-23	The purpose of this module is to introduce management theories, functions, and practices. It focuses on planning, organising, leading, and controlling resources to achieve organisational goals.
Module Fees: \$130	
Module Credits: 10	

Principles of Hospital Administration

Code: D6-PHA-23	The purpose of this module is to cover core concepts of hospital management, including planning, organisation, and leadership. It prepares students to oversee healthcare facilities effectively.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 2

Fundamentals of Accounting

Code: A5-FOA-23	The purpose of this module is to introduce basic accounting principles, financial statements, and bookkeeping. It focuses on understanding financial data, budgeting, and decision-making to manage resources effectively in healthcare or business settings.
Module Fees: \$130	
Module Credits: 10	

Human Biology 2

Code: D6-HB2-25	This module builds on core biological concepts by introducing pathology and pharmacology. Students learn about cell injury, inflammation, and neoplasms, alongside the therapeutic use of drugs. Topics include respiratory and cardiovascular drugs, antimicrobials, chemotherapy agents, and anaesthetics, equipping learners with essential knowledge for understanding disease mechanisms and treatment approaches.
Prerequisite: D5-HB1-25	
Module Fees: \$260	
Module Credits: 20	

Computer and its Essentials 2

Code: C6-CE2-20	This module builds on foundational computing skills, equipping students with advanced capabilities in Microsoft Excel and Google collaboration tools. It covers key spreadsheet functionalities, including data organisation, advanced formulas, chart creation, and data analysis using pivot tables. Additionally, students will explore Google Docs, Spreadsheets, Forms, and Drive to enhance online collaboration and information sharing.
Prerequisite: C5-CE1-20	
Module Fees: \$130	
Module Credits: 10	

Introduction to Global Health

Code: D5-IGH-23	The purpose of this module is to explore global health strategies, financing, and implementation in today's world. It examines the socioeconomic and environmental determinants of health, highlighting their impact on communities. Students will gain insights into global health challenges and solutions for improving health outcomes worldwide.
Module Fees: \$130	
Module Credits: 10	

Health Ethics, Law and Policy

Code: D6-HLP-23	The purpose of this module is to examine ethical, legal, and policy issues in healthcare. It covers patient rights, confidentiality, and regulatory frameworks to ensure ethical decision-making in healthcare administration.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 3

Hospital Services Management Core , Support and Utility

Code: D6-HSM-23	The purpose of this module is to focus on managing hospital operations, including patient care, resource allocation, and service delivery. It prepares students to ensure efficient and effective healthcare services.
Module Fees: \$130	
Module Credits: 10	
Health Database Management System	
Code: D6-DMS-23	The purpose of this module is to teach the design, implementation, and management of health databases. It focuses on ensuring accurate data storage, retrieval, and security for effective healthcare operations.
Module Fees: \$260	
Module Credits: 20	
Epidemiology	
Code: D6-EPI-13	The purpose of this module is to equip students with essential skills to study disease patterns and risks. It covers measures of disease occurrence, study design, clinical test accuracy, epidemiological analysis methods, and research ethics, enabling students to critically evaluate public health data and contribute to disease prevention and control.
Module Fees: \$260	
Module Credits: 20	
Health Informatics	
Code: D6-HEF-23	The purpose of this module is to explore the use of information technology in healthcare. It focuses on data management, electronic health records, and digital tools to improve patient care and operational efficiency.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 4

Health Economics

Code: D7-HEC-23	The purpose of this module is to equip students with the fundamental principles and tools used in health economics. It provides a comprehensive understanding of how economic principles can be applied to healthcare systems, including cost-effectiveness analysis, resource allocation, and the economic evaluation of health interventions.
Module Fees: \$130	
Module Credits: 10	

Medical Records Department

Code: D6-MRD-23	The purpose of this module is to teach the management of medical records. It focuses on maintaining accuracy, confidentiality, and accessibility of patient information in healthcare settings.
Prerequisite: D6-DMS-23	
Module Fees: \$130	
Module Credits: 10	

Patient Care and Safety in Hospitals

Code: D7-PCS-23	The purpose of this module is to emphasise patient-centered care, safety protocols, and quality improvement in healthcare settings. It prepares students to ensure optimal patient outcomes.
Module Fees: \$130	
Module Credits: 10	

Organisational Behaviour

Code: B7-OBE-25	This module explores organisational behavior, focusing on group dynamics, leadership, motivation, structure, and change management. Students will learn team building, conflict resolution, and labor management while analysing human and organisational interactions. Key topics include stress management, industrial relations, and the systems approach, preparing students to navigate evolving organisational environments effectively.
Module Fees: \$130	
Module Credits: 10	

Material Management in Hospitals

Code: D7-MMH-23	The purpose of this module is to manage hospital resources efficiently. It focuses on procurement, inventory control, and distribution of medical supplies and equipment.
Prerequisite: D6-HSM-23	
Module Fees: \$130	
Module Credits: 10	

Ethical and Legal Issues in Administration

Code: D7-ELA-23	The purpose of this module is to examine ethical and legal challenges in healthcare administration. It focuses on patient rights, compliance, and ethical decision-making in complex scenarios.
Prerequisite: D6-HLP-23	
Module Fees: \$130	
Module Credits: 10	

SEMESTER 5

Research Trends in Hospital Administration

Code: D7-RTH-23	The purpose of this module is to explore current research and innovations in hospital management. It focuses on evidence-based practices and emerging trends to improve healthcare delivery.
Module Fees: \$130	
Module Credits: 10	

Medical Terminology

Code: D7-MTE-23	The purpose of this module is to provide students with a foundational understanding of medical terms used in healthcare. It covers terminology related to various disease conditions, as well as the musculoskeletal, respiratory, and digestive systems, enabling effective communication in medical and clinical settings.
Prerequisite: D6-HB2-25	
Module Fees: \$260	
Module Credits: 20	

Healthcare Quality Management

Code: D7-HQM-23	The purpose of this module is to teach strategies for improving healthcare quality. It covers patient safety, performance metrics, and continuous improvement in healthcare delivery.
Prerequisite: D6-HSM-23	
Module Fees: \$130	
Module Credits: 10	

Strategic Management

Code: B7-STM-23	The purpose of this module is to teach strategic planning and decision-making in organisations. It focuses on aligning resources and goals to achieve long-term success in healthcare or other industries.
Prerequisite: D6-POM-23	
Module Fees: \$130	
Module Credits: 10	

SEMESTER 5 ELECTIVE GROUP (CHOOSE ONE)

Environmental Health and Safety

Code: D6-EHS-23	The purpose of this module is to address environmental factors affecting health. It focuses on safety protocols, risk assessment, and sustainable practices in healthcare settings.
Module Fees: \$130	
Module Credits: 10	

Disaster Management

Code: D6-DMA-23	The purpose of this module is to teach strategies for managing healthcare during disasters. It focuses on preparedness, response, and recovery in crisis situations.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 6

Research Methodology

Code: D6-REM-23	The purpose of this module is to introduce research design, data collection, and analysis techniques. It equips students with skills to conduct evidence-based studies in healthcare and related fields.
Prerequisite: D6-AWS-20	
Module Fees: \$130	
Module Credits: 10	

Medical Statistics

Code: D7-MST-13	The purpose of this module is to apply statistical methods to healthcare data. It covers data interpretation, analysis, and reporting to support decision-making in medical research and practice.
Prerequisite: D6-EPI-13	
Module Fees: \$260	
Module Credits: 20	

Health Insurance and Policies

Code: D7-HIP-23	The purpose of this module is to explore health insurance systems and policies. It focuses on understanding coverage, reimbursement, and regulatory frameworks in healthcare.
Prerequisite: D7-ELA-23	
Module Fees: \$130	
Module Credits: 10	

Human Resource Management

Code: B7-HRM-20	The purpose of this module is to teach recruitment, training, performance evaluation, and employee relations. It equips students with skills to manage human capital effectively in healthcare or other industries.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 6 ELECTIVE GROUP (CHOOSE ONE)

Personal and Professional Development

Code: D7-PPD-23	The purpose of this module is to enhance personal and professional skills. It focuses on communication, leadership, and career growth in healthcare administration.
Module Fees: \$130	
Module Credits: 10	

Public and Community Health

Code: D7-PCH-23	The purpose of this module is to explore public health initiatives and community engagement. It focuses on disease prevention, health promotion, and addressing health disparities.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 7

Research Project 1

Code: D7-RPR-23	The purpose of this module is to apply research skills to a specific healthcare topic. It involves designing, conducting, and presenting a research project under supervision.
Prerequisite: D6-REM-23	
Module Fees: \$130	
Module Credits: 10	

Disease Coding and CPT

Code: D7-DCC-23	The purpose of this module is to teach disease classification and procedural coding. It focuses on accurate documentation and billing in healthcare administration.
Prerequisite: D7-MTE-23	
Module Fees: \$260	
Module Credits: 20	

Entrepreneurship and Innovation

Code: B8-ENI-20	This module explores entrepreneurship and innovation, covering enterprise development, opportunity discovery, and business planning. It examines innovation principles, feasibility assessment, business modelling, and disruptive technologies. Students will learn to validate risks, market size, and pricing while developing entrepreneurial teams, fostering creativity, and building sustainable, innovative ventures.
Module Fees: \$260	
Module Credits: 20	

Risk Management

Code: D7-RMN-25	The purpose of this module is to teach strategies to identify, assess, and mitigate risks in healthcare settings. It focuses on patient safety, legal compliance, and organisational resilience.
Module Fees: \$130	
Module Credits: 10	

SEMESTER 8

Professional Practice

Code: D7-PRP-23	The purpose of this module is to prepare students for real-world healthcare administration. It focuses on practical skills, ethical practices, and professional development in healthcare settings.
Prerequisite: 240 credits	
Module Fees: \$540	
Module Credits: 40	

Research Project 2

Code: D8-RP2-23	The purpose of this module is to conduct an advanced research project in healthcare. It builds on Research Project 1, emphasising in-depth analysis and practical application.
Prerequisite: D7-RPR-23	
Module Fees: \$260	
Module Credits: 20
