

Bachelor of Science in Safety, Health and Environmental Management

Name of Programme	Bachelor of Science in Safety, Health and Environmental Management
Programme Overview	Ready to champion workplace safety and environmental well-being? The BSc in Safety, Health, and Environment (SHE) Management is an interdisciplinary programme that integrates occupational health, environmental science, and risk management principles. Learners study how to identify and assess workplace hazards, design effective control measures, and ensure compliance with safety and environmental regulations. The programme also places emphasis on sustainable practices. Graduates are prepared to meet the rising demand for SHE professionals across industries such as manufacturing, construction, and healthcare, making a meaningful contribution to both worker welfare and environmental stewardship.
Admission Requirements	IGCSE/equivalent with five Passes including a grade C in English, Mathematics/Statistics and Science (Biology, Chemistry, Physics or Double Science). Applicants in possession of a Diploma or Higher Diploma in related fields may be given exemptions based on the credit point equivalency.
Technical Requirements	To ensure a smooth and effective learning experience, students enrolling in this programme must meet the following technical requirements: Device Requirements Computer/Laptop: Windows (10 or later) or Mac (macOS 10.15 or later); Processor: Intel i3 (or equivalent) or above; RAM: Minimum 4 GB (8 GB recommended for multitasking); Storage: Minimum 20 GB free space for coursework and downloads; Camera and Microphone: Built-in or external for live sessions and presentations OR Tablet/Smartphone: Suitable for accessing content on the go (limited functionality for assignments/exams) Internet Requirements Connection speed: Minimum 5 Mbps download and 2 Mbps upload (10 Mbps recommended for seamless video conferencing); Stable Wi-Fi or Ethernet connection recommended for live Zoom sessions Software and Platforms Virtual Live Sessions: Zoom (synchronous learning); Document Processing: Microsoft Office (Word, Excel, PowerPoint) or equivalent (Google Docs) Browser Requirements Supported browsers: Chrome (latest version), Safari (for Mac users); Cookies and JavaScript: Enabled for full Blackboard functionality Additional Tools (Optional but Recommended) Headset: For clear audio during virtual classes; External storage (USB/Cloud): For backups of important coursework; Antivirus software: To protect against malware or data loss
Typical Full-Time Study Period	4 Years
Number of Modules	38 (36 core + 2 elective)
Total Programmes Credits	508
Fees per Programme Credit	\$13
Total Tuition Fee	\$6604

SEMESTER 1

Environmental Management	
Code: D5-ENM-25	This module introduces students to the principles and practices of environmental management. It covers environmental issues, classifications, and regulations, types of pollutants, waste management strategies, and assessment of environmental risks, health, and hazards. Students will also develop skills in conducting environmental audits to promote compliance and sustainable practices.
Module Fees: \$156	
Module Credit :12	
Computing and Information Skills	
Code: C5-CIS-23	This module provides students with essential computing knowledge and practical skills. It covers computer hardware, software, memory, and storage, alongside the historical development and current trends in computing. Students will gain proficiency in operating systems, word processing, spreadsheets, presentations, databases, internet use, and email for effective digital communication.
Module Fees: \$156	
Module Credit :12	
Business Communication	
Code: D5-BUC-25	The purpose of the module is to equip students with essential skills in academic writing, focusing on clear and structured communication in the Business fields. The module covers citation and referencing techniques, as well as research writing skills, enabling students to effectively present and support their academic work.
Module Fees: \$156	
Module Credit :12	
Mathematics for Safety, Health and	
Code: C5-MSH-25	This module introduces fundamental mathematical concepts essential covers numerals, fractions, decimals, percentages, ratio, proportion, measurement systems, and algebra. Students will also apply these concepts in practical contexts such as dosage, concentration, and statistics, developing essential skills for professional accuracy and application.
Module Fees: \$156	
Module Credit :12	
Advanced Integrated Science	
Code: C5-AIS-23	This module explores the interdisciplinary nature of advanced integrated science by combining biological, chemical, and physical concepts. Students will study principles across disciplines, analyse energy, forces, motion, and reactions within systems, and develop practical skills in designing experiments, data analysis, interpretation, and scientific reasoning for holistic scientific understanding.
Module Fees: \$156	
Module Credit :12	

SEMESTER 2

Quality Management

Code: D6-QUM-21	The purpose of this module is to equip students with the knowledge and tools necessary to design, implement, and maintain effective quality assurance systems within organisations. It aims to promote continuous improvement, customer satisfaction, and operational excellence through the application of quality standards and methodologies.
Module Fees: \$156	
Module Credits: 12	

Introduction to Occupational Health and Safety Management

Code: D6-OHS-21	This module introduces fundamental concepts of occupational health and safety management. It explores ILO instruments, national prevention tools, workplace programmes, and OSH management systems. Students will examine industrial toxin guidelines, HIV/AIDS workplace issues, health promotion, education, and injury prevention, alongside policy formulation to enhance safe and healthy working environments.
Module Fees: \$156	
Module Credits: 12	

Risk Management

Code: D6-RSM-23	The purpose of this module is to equip students with the skills and strategies to identify, assess, and mitigate risks in various organisational contexts. It aims to promote proactive decision-making and resilience by minimising potential threats and maximising opportunities for success.
Module Fees: \$156	
Module Credits: 12	

Occupational Health and Safety Law I

Code: D6-OHL-21	The purpose of this module is to familiarise students with the legal frameworks and regulations governing workplace safety and health standards. It aims to promote compliance, protect employee rights, and ensure safe working environments through an understanding of legal responsibilities and obligations.
Module Fees: \$156	
Module Credits: 12	

Safety Procedures at the Workplace

Code: D7-SPW-25	This module equips students with knowledge skills to implement safety procedures in the workplace. It covers hazard identification, risk assessment, emergency response, use of personal protective equipment, and adherence to health and safety regulations. Students will develop the competence to maintain safe, compliant, and efficient work environments.
Module Fees: \$156	
Module Credits: 12	

SEMESTER 3

HIV and AIDS Management

Code: D6-HIV-23	This module provides comprehensive knowledge of HIV and AIDS management. Students will explore surveillance, prevention strategies, social determinants of care, and the role of the private sector. It covers antenatal screening, mother-to-child transmission, innovative treatments, gene-expression strategies, and challenges such as drug interactions, equipping students for effective HIV/AIDS intervention.
Module Fees: \$156	
Module Credit :12	

Occupational Epidemiology

Code: D7-OEP-25	This module introduces students to epidemiological principles and methods within occupational health. It covers epidemiological approaches, data sources, measurement techniques, and disease spread analysis, including mortality and morbidity rates. Students will learn research designs, data collection tools, and software applications for disease screening and classification in workplace contexts.
Module Fees: \$156	
Module Credit :12	

Ergonomics

Code: D6-ERG-25	The purpose of this module is to study the interaction between humans and their working environments to optimise safety, comfort, and productivity. It aims to apply principles of design and engineering to reduce physical strain, prevent injuries, and enhance overall efficiency in various tasks and workplaces.
Module Fees: \$156	
Module Credit :12	

Biostatistics

Code: D7-BST-21	The purpose of this module is to provide students with the foundational knowledge and skills in statistical methods used in the field. It covers data analysis, probability, statistical inference, and the application of statistical tools to interpret biological and medical research effectively.
Module Fees: \$156	
Module Credit :12	

Emergency Preparedness and Disaster Management

Code: D7-EPM-21	The purpose of this module is to equip students with skills to plan, respond to, and manage emergencies and disasters. It focuses on risk assessment, crisis communication, resource coordination, and recovery strategies to minimise impacts and ensure safety in various settings.
Module Fees: \$156	
Module Credits: 12	

SEMESTER 4

Organisational Behavior

Code: B6-ORB-25	The purpose of this module is to explore the dynamics of individual and group behaviour within organisational settings. It aims to enhance students' understanding of how effective leadership, communication, and motivation contribute to achieving organisational goals and improving workplace performance.
Module Fees: \$156	
Module Credit :12	

Occupational Health and Safety Law II

Code: D7-OS2-25	The purpose of this module is to deepen students' understanding of advanced legal principles through case studies related to workplace safety and health regulations. It aims to enhance skills in interpreting and applying complex legal requirements to ensure organisational compliance and foster a culture of safety.
Prerequisite: D6-OHL-21	
Module Fees: \$156	
Module Credit :12	

Occupational Toxicology

Code: D7-OTX-25	This module introduces students to modern occupational toxicology, emphasising underlying mechanisms of toxicity. It covers the identification of toxicants, their effects on the body, cellular injury mechanisms, and the body's adaptive responses to exposure. Students will gain essential knowledge for assessing, managing, and preventing toxic hazards in the workplace.
Module Fees: \$156	
Module Credit :12	

Fire Ecology and Management

Code: D7-FEM-25	This module provides students with knowledge of fire chemistry, fire ecology, and management principles. It covers the importance of fire safety, risk assessment, and the development of strategies to minimise fire incidents. Students will also learn to ensure compliance with legal and regulatory requirements in workplace and community settings.
Module Fees: \$156	
Module Credit :12	

Environmental Impact Assessment

Code: D7-EIA-23	The purpose of this module is to provide students with the tools and methodologies to evaluate the potential environmental consequences of projects and policies. It aims to promote sustainable development by identifying mitigation measures and ensuring informed decision-making that balances economic growth with environmental protection.
Module Fees: \$156	
Module Credit :12	

SEMESTER 5

Incident/Accident Investigation	
Code: D7-IAI-25	The purpose of this module is to equip students with the knowledge and skills to identify, analyse, and prevent workplace accidents effectively. It aims to promote a culture of safety by teaching systematic investigation techniques and implementing preventive measures to reduce risks and enhance organisational safety standards.
Module Fees: \$156	
Module Credit :12	
Concepts and Principles of Climate	
Code: D7-PCC-25	This module introduces students to the fundamental concepts and principles of climate change. It covers the impacts of climate change, the relationship between fossil fuels, greenhouse gases, and global warming, relevant legal frameworks and international agreements, and strategies for reducing carbon footprints and enhancing carbon sinks for sustainable environmental management.
Module Fees: \$156	
Module Credit :12	
Global Health Dynamics	
Code: D7-GHD-23	The purpose of this module is to examine the complex factors influencing health outcomes and systems across different regions and populations worldwide. It aims to explore strategies for addressing global health challenges, such as infectious diseases, health inequities, and cross-border health threats, through collaborative and innovative approaches.
Module Fees: \$156	
Module Credit :12	
Waste Management and Pollution	
Code: D7-WMN-25	This module provides students with knowledge of waste types and their impacts on the environment and public health. It covers relevant legal requirements and explores practical strategies for waste management and pollution control. Students will develop skills to implement effective, sustainable solutions for environmental protection and health safety.
Module Fees: \$156	
Module Credit :12	
Safety Management and the Built	
Code: D6-SMB-21	This module introduces principles of safety management within the built environment. Students will explore risk assessment, hazard identification, and strategies to ensure health and safety in construction and building operations. Emphasis is placed on regulatory compliance, safety planning, and practical measures to create secure and sustainable built environments.
Module Fees: \$156	
Module Credit :12	

SEMESTER 6

Research Methods

Code: D7-RSM-23	The purpose of this module is to equip students with a comprehensive understanding of quantitative, qualitative, and systematic review methodologies. Students will learn to critically read and analyse health sciences literature, gaining the skills to evaluate research studies and apply appropriate methodologies.
Module Fees: \$156	
Module Credit :12	

Security Management

Code: D7-SMN-23	This module introduces students to the principles of security management within organisations. It covers the roles and responsibilities of security managers, types of security management, skills of competent personnel, relevant legislation, site evaluations, and incident reporting. Students will develop practical and analytical skills for effective organisational security management.
Module Fees: \$156	
Module Credit :12	

Occupational Hygiene

Code: D7-OCH-25	The purpose of this module is to educate students on identifying, evaluating, and controlling workplace hazards that may affect worker health and well-being. It aims to promote safe and healthy work environments through the application of scientific principles and preventive measures.
Module Fees: \$156	
Module Credit :12	

First Aid Procedures

Code: D7-FAP-25	The purpose of this module is to equip students with the essential knowledge and skills to provide immediate and effective care in emergency situations. It aims to promote confidence and competence in administering first aid to preserve life, prevent further injury, and support recovery until professional medical help arrives.
Module Fees: \$156	
Module Credit :12	

Counseling at the Workplace

Code: D7-COW-25	This module equips students with knowledge and skills for effective workplace counselling. It covers the importance of counselling, multicultural competencies, ethics, psychoanalytic and behavioural approaches, self-awareness, and counsellor self-care. Students will learn key counselling processes and gain practical experience in conducting brief, professional counselling sessions within organisational settings.
Module Fees: \$156	
Module Credit :12	

SEMESTER 6 ELECTIVE GROUP (CHOOSE ONE)

Health and Safety in Transport

Code: D7-HST-21	The purpose of this module is to educate students on the principles and practices of ensuring safety and well-being in transportation systems and operations. It aims to address risks, promote regulatory compliance, and implement strategies to protect passengers, workers, and the public in various transport environments.
Module Fees: \$156	
Module Credit :12	

Building Maintenance

Code: D7-BDM-21	The purpose of this module is to provide students with the knowledge and skills necessary to ensure the proper upkeep and functionality of buildings and infrastructure. It aims to promote efficient maintenance practices, prolong the lifespan of structures, and ensure safe and comfortable environments for occupants.
Module Fees: \$156	
Module Credit :12	

Employee Relations

Code: D7-ERT-21	The purpose of this module is to explore the dynamics and strategies for fostering positive relationships between employers and employees within an organisation. It aims to promote effective communication, conflict resolution, and fair practices to enhance workplace harmony, productivity, and employee satisfaction.
Module Fees: \$156	
Module Credit :12	

SEMESTER 7

Safety, Health and Environmental Management Systems

Code: D8-SHE-25	This module introduces students to the principles and practices of safety, health, and environmental management systems. It covers risk assessment, regulatory compliance, and the design and implementation of management frameworks. Students will develop skills to monitor, evaluate, and improve organisational systems, ensuring workplace safety, environmental protection, and sustainable operations.
Module Fees: \$156	
Module Credit :12	

Research Project 1 (Proposal Writing)

Code: D7-RP1-23	This module equips students with skills to design and develop a comprehensive research proposal. It covers critical analysis, evaluation, and synthesis of academic materials, identification of research gaps, justification of methodology and tools, and formulation of a primary research project proposal to serve as the foundation for a dissertation. Students develop a research proposal under a supervisor's guidance, and present their proposal.
Prerequisite: D7-OEP-25	
Module Fees: \$156	
Module Credit :12	

Records Management in the Workplace

Code: D7-RMW-25	This module introduces students to effective records management in workplace settings. It covers the documentation of incidents and accidents, including details of injuries, witnesses, and preventive measures. Students will develop skills to accurately record, report, and maintain workplace records, ensuring compliance, accountability, and informed decision-making for health and safety management.
Module Fees: \$156	
Module Credit :12	

Environmental Sustainability

Code: D8-ENS-25	This module explores principles of ecology and human-environment interactions to promote sustainable practices. Students will examine self-sustaining ecosystems, population stabilisation strategies, and conservation of biological diversity, water, and land resources. The module also addresses the relationship between economics and the environment, equipping students to develop solutions for sustainable environmental management.
Module Fees: \$156	
Module Credit :12	

SEMESTER 7 ELECTIVE GROUP (CHOOSE ONE)

Food Safety and Hygiene

Code: D8-FSH-23

The purpose of this module is to educate students on the principles and practices of handling, preparing, and storing food safely to prevent contamination and foodborne illnesses. It aims to promote compliance with health standards and ensure the delivery of safe, high-quality food to consumers.

Module Fees: \$156

Module Credit :12

Introduction to Mine Safety

Code: D8-MNS-25

The purpose of this module is to provide students with the knowledge and skills to identify, assess, and mitigate hazards in mining operations. It aims to promote a culture of safety, ensure regulatory compliance, and protect the health and well-being of workers in the mining industry.

Module Fees: \$156

Module Credit :12

SEMESTER 8

Research Project 2

Code: D7-RP2-25

Prerequisite: D7-RP1-25

This module guides students in continuing and completing their research proposals through a structured dissertation. Students will conduct in-depth research on environmental sustainability topics, apply appropriate methodologies, analyse data, and critically interpret findings. The module develops independent research, problem-solving, and academic writing skills for contributing to sustainable environmental practices.

Module Fees: \$208

Module Credits: 16

Industrial Attachment

Code: D7-INA-25

Prerequisite: 240 credits

This module develops students' specialist knowledge and professional competencies in Safety, Health, and Environmental Management (SHEM). It emphasises lifelong learning, multidisciplinary problem-solving, informed decision-making, research, and effective communication. Students will also explore entrepreneurship, practical application of knowledge, and reflection on how their programme studies contribute to workplace performance and professional growth.

Module Fees: \$780

Module Credits: 60
