

Master of Science in Information Systems Management

Name of Programme	Master of Science in Information Systems Management
Programme Overview	Ready to excel in managing technology and innovation? Our Master of Science in Information Systems Management is a professionally oriented programme designed for aspiring leaders in the digital era. It develops advanced critical thinking and technical expertise in systems analysis and design, project management, data management, cybersecurity, and business intelligence, with a strong focus on global best practices. Graduates are prepared for leadership roles where they can apply technical knowledge and strategic insight to drive organisational success. The programme equips students to work independently or within multidisciplinary teams, addressing the complexities of modern information systems with integrity and professionalism.
Admission Requirements	Bachelors or Honours Bachelors Degree from a recognised institution in Computing/Computer Science/Information Technology or any computer field
Technical Requirements	To ensure a smooth and effective learning experience, students enrolling in this programme must meet the following technical requirements: Device Requirements Computer/Laptop: Windows (10 or later) or Mac (macOS 10.15 or later); Processor: Intel i3 (or equivalent) or above; RAM: Minimum 4 GB (8 GB recommended for multitasking); Storage: Minimum 20 GB free space for coursework and downloads; Camera and Microphone: Built-in or external for live sessions and presentations OR Tablet/Smartphone: Suitable for accessing content on the go (limited functionality for assignments/exams) Internet Requirements Connection speed: Minimum 5 Mbps download and 2 Mbps upload (10 Mbps recommended for seamless video conferencing); Stable Wi-Fi or Ethernet connection recommended for live Zoom sessions Software and Platforms Virtual Live Sessions: Zoom (synchronous learning); Document Processing: Microsoft Office (Word, Excel, PowerPoint) or equivalent (Google Docs) Browser Requirements Supported browsers: Chrome (latest version), Safari (for Mac users); Cookies and JavaScript: Enabled for full Blackboard functionality Additional Tools (Optional but Recommended) Headset: For clear audio during virtual classes; External storage (USB/Cloud): For backups of important coursework; Antivirus software: To protect against malware or data loss
Typical Full-Time Study Period	2 years
Number of Modules	10 (8 core + 2 elective)
Total Programmes Credits	240
Fees per Programme Credit	\$19.50
Total Tuition Fee	\$4680

SEMESTER 1

Big Data Management

Code: C9-BDM-22	This module provides a broad understanding of big data and technologies used in managing urban data. Topics include big data ecosystems, parallel programming, MapReduce, Hadoop, Spark, Pig, and NoSQL solutions. Students will develop analytical solutions and gain hands-on experience with Apache Spark and Hadoop.
Module Fees: \$390	
Module Credits: 20	

System Development Management and Governance

Code: C9-SDG-22	This module examines the link between governance and sustainable development, focusing on stakeholder involvement in policy processes. Students will explore governance complexities, sustainable development goals, and policy-making, while developing analytical and problem-solving skills, and effectively using online platforms for communication and knowledge exchange.
Module Fees: \$390	
Module Credits: 20	

SEMESTER 1 ELECTIVE GROUP (CHOOSE ONE)

Infrastructure Management

Code: C9-IFM-22	This module provides students with knowledge of IT infrastructure management, focusing on storage, security, and service delivery. Students will analyse security practices, threats, and challenges in IT, understand IT ethics, and explore emerging trends in the IT sector to manage infrastructure effectively.
Module Fees: \$390	
Module Credits: 20	

ICT Strategic Management

Code: C9-ICM-22	This module covers strategic IT management, including infrastructure, service delivery, security, and emerging trends. Students will learn to align IT with organisational goals, develop IT strategies, assess current systems, and recommend improvements, while addressing key future IT management issues.
Module Fees: \$390	
Module Credits: 20	

SEMESTER 2

Information Security Management

Code: C9-ISM-15	This module focuses on information security threats and countermeasures, covering key concepts, technologies, and management techniques. Students will gain practical experience in penetration testing, incident response, and cybercrime investigation, learning to secure information systems, detect vulnerabilities, and implement security measures like firewalls and intrusion prevention systems.
Module Fees: \$390	
Module Credits: 20	

ICT Project Management

Code: C9-IPM-22	This module equips students with advanced project management skills, focusing on software/IT project activities, risk management, scheduling, quality control, and resource allocation. Students will learn to apply methodologies, estimate costs, and manage software projects effectively while developing interpersonal skills for teamwork and achieving organisational goals.
Module Fees: \$390	
Module Credits: 20	

SEMESTER 2 ELECTIVE GROUP (CHOOSE ONE)

Content Management Systems

Code: C9-CMS-22	This module introduces students to content management systems (CMS), focusing on WordPress, Drupal, and Joomla. Students will learn the differences between CMS and static websites, explore server-side databases, create and deploy CMS websites, and understand maintenance considerations, content creation, and custom template development.
Module Fees: \$390	
Module Credits: 20	

Data Analytics

Code: C9-DAN-22	This module focuses on developing the skills to make informed decisions using data analytics. Students will apply various data analytics techniques, from descriptive to predictive analytics, to real business problems and learn how to prepare data for effective analysis and communication of results.
Module Fees: \$390	
Module Credits: 20	

SEMESTER 3

Principles of Information Technology Management

Code: C9-PIM-22	This module focuses on management decisions in single and multi-user systems, network architecture, database management, and software development. Students will evaluate interdisciplinary management concepts, assess the role of information systems in organisations, and demonstrate proficiency in solving business problems using software applications.
Module Fees: \$390	
Module Credits: 20	

Management Information Systems

Code: C9-MIS-22	This module introduces Management Information Systems (MIS), focusing on techniques for managing IT opportunities to enhance organisational competitiveness. Students will learn to identify key aspects, classifications, and types of MIS, data warehousing, data mining, and planning enterprise resource systems for effective IT project management.
Module Fees: \$390	
Module Credits: 20	

Research Project 1: Proposal Writing

Code: C9-RP1-25	This module provides students with a solid understanding of research methodologies, theory, and processes. Students will learn to plan, design, and manage research projects, select appropriate research methods, critically review literature, consider ethical issues, and effectively write research proposals and dissertations.
Module Fees: \$390	
Module Credits: 20	

SEMESTER 4

Research Project 2: Dissertation

Code: C9-RP2-25	This module enables students to undertake individual computer science projects, with supervision, covering various areas like system management. Students will investigate problems, design solutions, manage risks, implement and test solutions, evaluate research, and produce a dissertation. The project may be industry-based with formal presentations.
Prerequisite: C9-RP1-25	
Module Fees: \$1170	
Module Credits: 60
